EXPERIENCE

Associate Software Engineer

Apr 2024 – Present

Octopi Digital LLC

Bashundhara, Dhaka

- Architected and developed **TAINC**, an enterprise **SaaS CRM** using **TypeScript, Node.js, Express.js, MongoDB, and Socket.io** with **multi-tenant architecture**; optimized API performance through database indexing, query optimization, and caching — achieving **40% faster response times** and scalability for **10,000+ concurrent users**
- Reduced infrastructure costs by implementing a **server-side image caching layer** for **Google Static Maps API** — eliminating redundant API calls by fetching, storing, and reusing map images across all client and crew-facing views
- Implemented **real-time conversation management system** supporting multi-channel outreach including **SMS, voice calls, and WhatsApp messaging**, reducing response time by 40%
- Built **Monkeymans**, an employee management system using React, Node.js, Express.js, MongoDB, with features like **attendance tracking, task creation, progress monitoring, leave management, and KPI analysis**
- Customized and white-labeled **Open WebUI** to meet unique client needs across different industries, tailoring both UI and functionality to fit business requirements using **FastAPI, SQLite, VectorDB, RAG architecture, Redis, and Svelte** tech stack
- Accelerated development velocity by integrating AI-assisted tooling — **GitHub Copilot** for code completion, **ChatGPT and Claude** for architecture brainstorming, and **Cursor AI** for refactoring — improving sprint throughput and reducing review cycles across the engineering team
- Championed system design best practices by enforcing **horizontal scalability, fault tolerance, and separation of concerns**; built resilient architectures with **load balancing, rate limiting, and Redis caching**; eliminated bottlenecks via query optimization, connection pooling, and async processing
- Served as a primary technical point of contact for **international clients** — leading end-to-end project lifecycle communication including **requirement gathering, sprint planning, weekly progress updates, deployment walkthroughs, and post-launch support**; consistently translated complex technical concepts into clear, actionable updates, ensuring alignment between client expectations and delivered solutions across multiple concurrent projects
- Managed end-to-end **production deployments** on **VPS and Ubuntu servers** — configuring **Nginx** as a reverse proxy, setting up **SSL/TLS** with Let's Encrypt, managing **PM2** process management, and automating deployments via shell scripts; ensuring high availability and minimal downtime across multiple client-facing applications
- Mentored 5+ junior software developers and conducted technical interviews for 10+ candidates

PROJECTS

SpeakAI - English Practice App | Next.js, Python, FastAPI, MongoDB, AI

Live [GitHub](#)

- SpeakAI** is an **AI-powered** English practice app combining speech recognition and **natural language processing** for personalized learning. It is built with Next.js, FastAPI, MongoDB, and JWT **authentication**
- The platform integrates **OpenAI Whisper** for speech-to-text, **Groq AI** for conversation, and **AI Model** for natural **text-to-speech**. Tailwind CSS ensures a responsive and **user-friendly** design
- Users receive **pronunciation feedback, grammar corrections**, and achievement-based **progress tracking**. This project demonstrates expertise in full-stack development, AI integration, and real-time analytics

EDUCATION

Green University of Bangladesh

Feb 2021 – Feb 2025

B.Sc in Computer Science & Engineering, CGPA: 3.41/4.0

Dhaka, Bangladesh

- Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Machine Learning
- Activities: Green University Language Club IT Advisor

TECHNICAL SKILLS

Programming Languages: JavaScript/TypeScript, Python, C++, SQL

Frameworks & Libraries: React, Next.js, Redux, Node.js, Express.js, FastAPI, Socket.io

Databases & Storage: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, Git, Linux

ACHIEVEMENTS & CERTIFICATIONS

Certifications: Web Development from Programming Hero (2024), Web Design from BASIS SEIP Project (2022)

Content Creation: Currently producing a **YouTube tutorial series** on *Mastering System Design* — covering scalability, distributed systems, and real-world architecture patterns [Link](#)

Scores: **LeetCode** - Rating: 1400+, Solved Problems: 70+

Research: Identification of Chromosomes In Bio-informatics Using Deep Learning Algorithms
